PROFIL

I am a passionate Front-end developer and AI/ML student with strong skills in HTML, CSS, and JavaScript, and a foundational knowledge of Python , MySQL , React and Java. My goal is to create user-friendly interfaces and improve my skills in AI and ML through practical projects and continuous learning. I am dedicated to achieving excellence in my field and equipped with the necessary technical skills to tackle complex challenges

PROJECTS

Front-End Restaurant Webpage - Desi Bites | HTML, CSS, JS 🔗

Developed a responsive restaurant website with an interactive menu, cart functionality and user experience. Implemented real-time price calculation and focused on clean UI

Personal Portfolio Website | HTML, CSS, JS, EmailJS 🔗

Built a responsive portfolio to showcase projects and skills.
Integrated EmailJS for contact form functionality with client-side validation.

Front-End Gaming Merchandise Website - GameX | HTML, CSS, JS 🔗

Designed an interactive e-commerce-style interface with dynamic UI elements.
Implemented JavaScript-based event handling and responsive layouts.

Loan Prediction Model | Python, Machine Learning

Developed and evaluated ML models for loan approval prediction using real-world data.
Performed data preprocessing and analysed results using standard evaluation metrics.
